### Product Description

The PLC® Guardmaster Safety Relays from Rockwell Automation® include eight products capable of monitoring a broad range of devices in a variety of applications. These safety relays help simplify purchasing and parts management making them an excellent migration product for the MSR product line. The GSR safety relays offer configurable safety functions and are able to cover the range of functions offered by legacy MSR relays, but with fewer catalog numbers. The GSR relay family also provides this functionality in a more compact, cost-effective solution that optimizes panel space. In addition, GSR relays meet the latest functional safety standards such as ISO 13849-1 and IEC 62061 while offering key functions to help simplify installation and reduce system complexity.
